How to setup a Sony Bravia for TEOS

When starting the Sony Bravia for the first time, a first-time setup will start. Proceed with this as normal.

Pro settings mode

1. Navigate to **“Apps”** and select the app **“Pro settings”**, switch to **“Pro settings mode”**.

2. After doing so the device will shortly load and then display:
Pro settings in process
3. Pro settings mode is now active.

Enable ADB

ADB is required on the end device for stable use of TEOS. Please see the following guide for enabling ADB:

How to enable ADB-USB debuggin

Installing the TEOS application

Installing the application TEOS can be done in two ways:

- Using the enabled ADB. (Installing over network)
- Using an USB stick with the application.

Installing with ADB

Please see the following for installation of an application using ADB:

How to install or
uninstall apps with .

The latest TEOS applications can be found on: [Resources - TEOS](#)

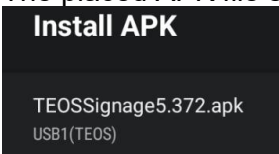

Installing with an USB stick

1. Insert a USB into your workstation and place the desired applications in the root of the USB stick.
2. Insert the USB into the Sony Bravia and navigate to the “**Pro settings**” and select “**Install APK.**”

A dark grey rectangular button with the text 'Install APK' in white, centered on the button.

Install APK

3. The placed APK file should appear, select it to install the application.

A dark grey dialog box with a white border. At the top, it says 'Install APK' in white. Below that, it lists the file name 'TEOSSignage5.372.apk' and the source 'USB1 (TEOS)' in white text.

Install APK

TEOSSignage5.372.apk
USB1 (TEOS)

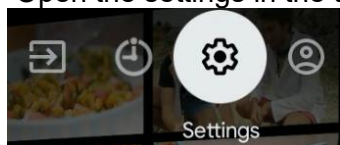

You have now successfully installed an application on the Sony Bravia.

Settings

There are changes to be made in the default settings and pro settings of the device to provide optimal performance.

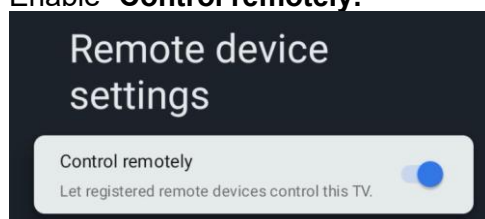

Default settings

Open the settings in the top right.

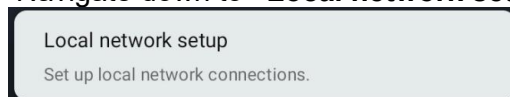

Network and Internet

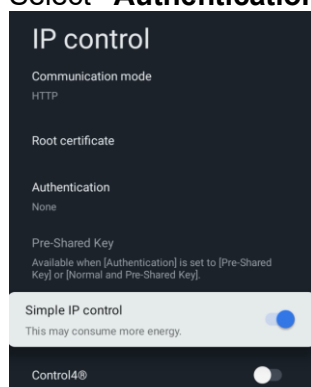

1. Navigate to **“Remote device settings.”**
2. Enable **“Control remotely.”**

3. Navigate down to **“Local network setup.”**

4. Select IP control and enable **“Simple IP control.”**
5. Select **“Authentication”** and set this to **“None.”**

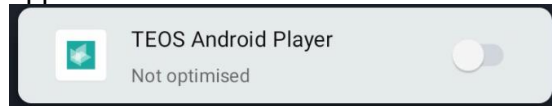

For Sony Bravia devices released after August 2025, additional configuration is needed, please see:

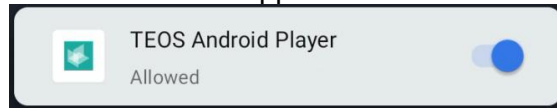

How to enable
Simple IP Control or

Apps

1. Select “**Special app access**” and open “**Energy optimisation.**” Disable Energy optimisation for the TEOS application.

2. Navigate back and go to “**Display over other apps,**” enable this for the TEOS application.

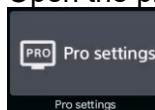

3. On Android 12 there is also a permission called “**Turn screen on**”, enable this for the TEOS application.

System

1. Open “**Date and time**” and make sure that the right time is setup.

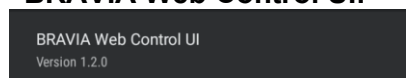

Pro settings

Open the pro settings.

Actions

1. To enable Web UI open “**Start-up services**” and install “**BRAVIA Web Control UI.**”

Follow the step in the installation process, the device will restart.

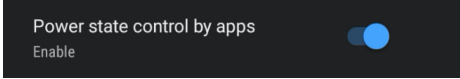

Settings

1. Set **“AC power on”** to **“Always on.”**
