1. Introduction

TEOS Manage, the core platform powering TEOS, gives organizations the power to transform their workplace so that device management is streamlined, usage of space is optimized, energy costs are reduced, communication is targeted, and worker productivity is amplified.

TEOS is the most flexible workplace management solution.

2. Requirements

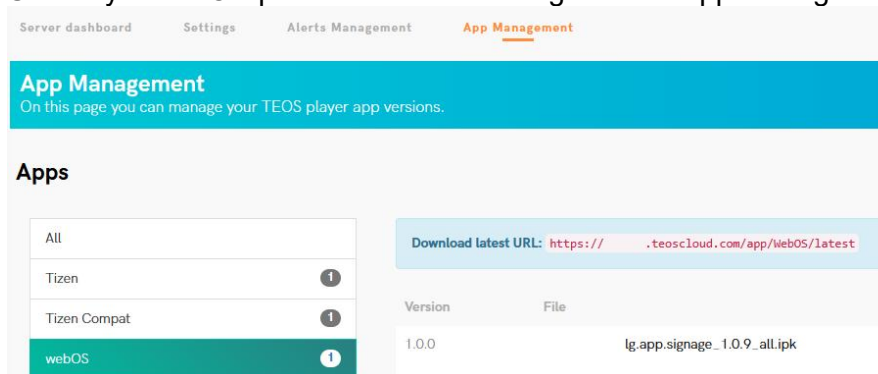

If you want to install TEOS on your webOS display, you need to meet the following requirements:

- Have TEOS version 3.5.0 or higher
- Display which is running webOS
- Recommended minimum space: 4GB
- Recommended memory: 2GB
- Wi-Fi or cable internet connection*

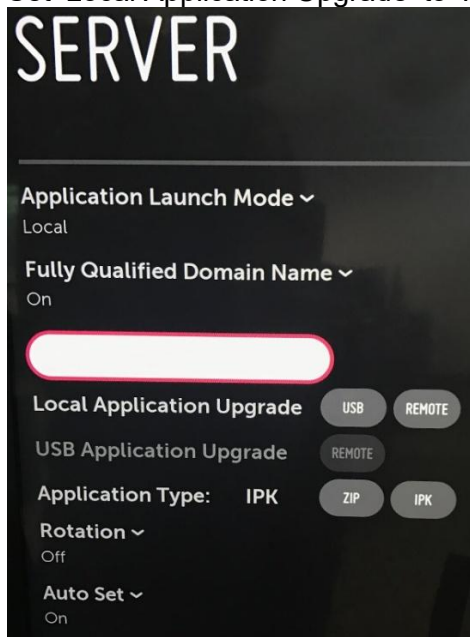

* A cable connection is recommended for displaying Full HD or higher resolution content.

3. How to install the TEOS webOS player

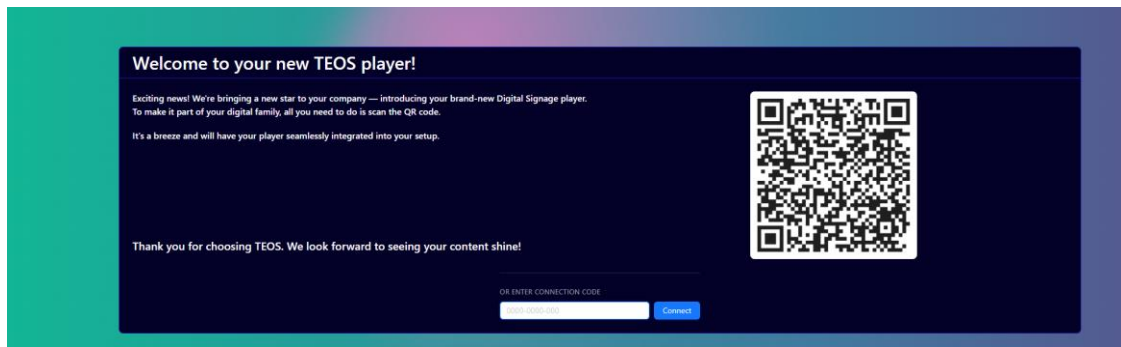

1. Using the gear icon on the remote, go to EZ Setting > SI Server Setting.
2. Select 'SI Server Setting'.
3. Enable Fully Qualified Domain Name.
4. Now a web URL needs to be filled out so the display knows where to download the application. The URL for the application depends on your environment, you can find the URL in your TEOS portal at: Server Management > App Management > webOS

5. Set 'Application Launch Mode' to 'Local'.
6. Set 'Application Type' to 'IPK'.
7. Set 'Local Application Upgrade' to 'Remote' and select 'Confirm'.

8. Reboot the device using the standby button on the remote; the application should update and start automatically. This shows the QR code or an option to enter the connection code from TEOS.

4. Need help?

Our support team is available Mon–Fri, 9:00–17:00 CET
