TV creation workflow

To use the Corporate TV in a device, a user must use TEOS Connect Mobile App in order to get the authentication code and the control of the device. TEOS Connect Receiver needs to be installed in the device in order get the control of the device. TEOS Connect Receiver license is not mandatory to get the control, when using TEOS Connect Mobile app, the workflow is the following one:

If TEOS Connect Receiver license is not added to the device, TEOS Connect Mobile will only be able to find the device by IP Address and not by device name.

1.2 Hardware Specification for Corporate TV add-on

The device compatible with this streaming option are:

- 1) Professional BRAVIA with Android Model from FY18 (instable in older version)
- 2) Professional Android Players (please refer to the

		Android player compatible with TEOS
	Resolutions max supported by TEOS Signage	Up to UHD (3840x2160)
	HDMI output format	16/9 formats
	Screen rotation	Landscape, portrait (hidden, only with a command or external app)
	СРИ	S905X2 Quad Core with ARM Dvalin MP2 GPU,
		S905X3 Quad-Core 64bits,
		RK3318 Quad Core CPU Cortex- A53
Performance required*	RAM	4GB (minimum)
remonnance required	Storage	16GB (minimum), 32GB (recommended)
	Operating System	Android 8.1, Android 9, Android 10 root rights is needed
	Media compatible with TEOS	Images: JPG,PNG, GIF (Full HD max for tablets and 8MP for BRAVIA)
		Videos: MP4 only, up to 4K@60p 40mbps for lanscape and Full HD in portrait @ 8mbps, full HD
		PDF (converted in images)
		PowerPoint, pptx (converted in images)

Example website	Reference	AAV-X96-Max
Example Website	Website	https://aavhardware.com/shop/players/aav-x96-max-signage-player/

^{*} TEOS is not compatible with all players by default as it can depend on hardware specs

The maximum resolution tested for IPTV stream is 1080p @30fps with a bit rate of 4Mbps max, up to 2 streams can be used on the Corporate TV module

Both devices can support 4K @60fps with 60Mbps for video playout directly in TEOS Apps.

2. Install of TEOS into the compatible devices

2.1 Preparation of BRAVIA

In order to use Corporate TV for TEOS into a BRAVIA, you will have to install both TEOS Signage Player App (from version 4.30) and TEOS Connect (from version 1.9.4.0). To do so, please follow the manuals:

- Professional BRAVIA - Install TEOS Apps for TEOS Manage - rev1.1.pdf

Both documents can be found in https://bit.ly/sonypsetech section technical documentations

2.2 Preparation of Android Player

In order to use Corporate TV for TEOS into a Player, you will have to install both TEOS Signage Player App (from version 4.30), TEOS Control App version 1.24 and TEOS Connect (from version 1.9.4.0). To do so, please follow the manuals:

Professional Players for TEOS - Installation & User Manual - rev1.3.pdf

Both documents can be found in https://bit.ly/sonypsetech section technical documentations

^{*} Please contact us for other player integration/tests. They must be tested with TEOS platform before validation.

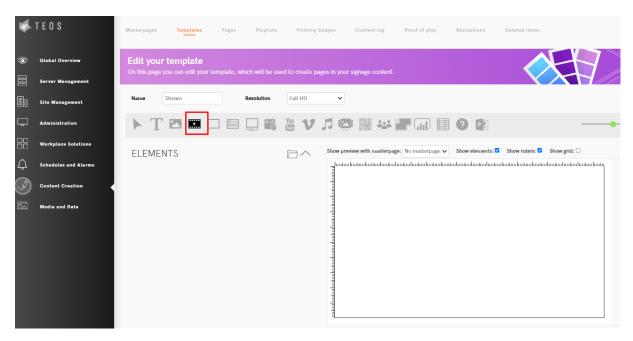

3. Play streams using Manage for TEOS

This section will explain how to configure the platform and the device to show streams under Signage and under Corporate TV Add-on.

3.1 Adding streams into TEOS Signage

Signage mode Complete

Open your Manage for TEOS interface and go to Content Creation, create a new template or use an existing template based on your resolution. Select the video element and design a zone in the template where you want to video element to be shown.

When the zone is defined, a pop-up will be shown where you will have to give a name to the element (in name filed) and go to streaming tab to put your stream URL.

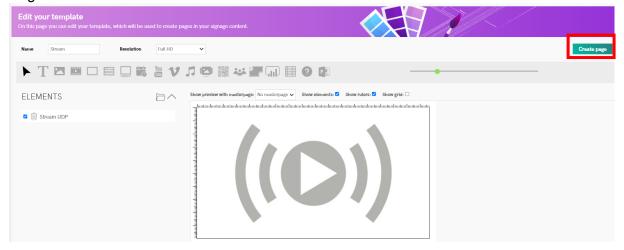

Video General Layout Data Streaming Touch Name Stream UDF Editable in page Stream url Udp://224.0.0.1:1234

Layout positioning can be changed in the pop-up by defining position, height and width values

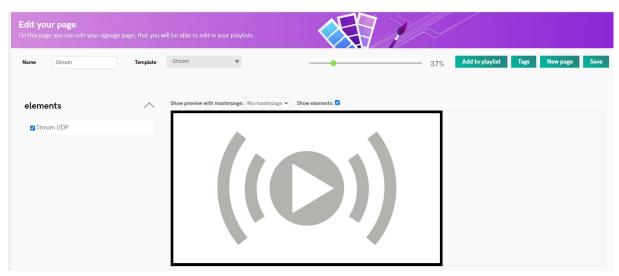

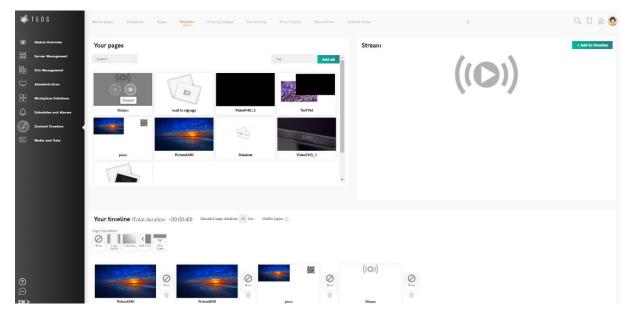

After configuring, press save, your element will be shown in your template. You can create from this same interface a page that will be included later into your playlist, press "Create Page".

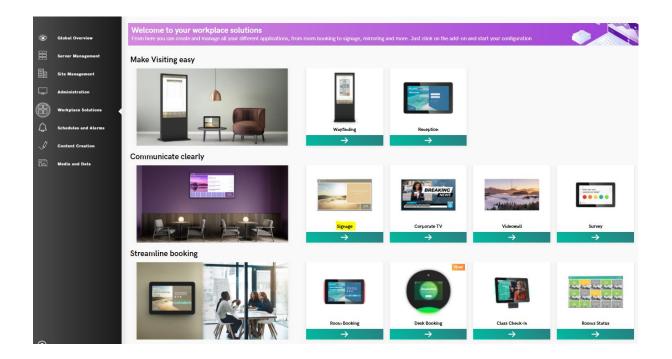

Define a name for your new page based on the template. You can change the URL of your video element in the page if you want to. The design of the page cannot be changed anymore in a page, you must go to the original template if you want to change the design of your template

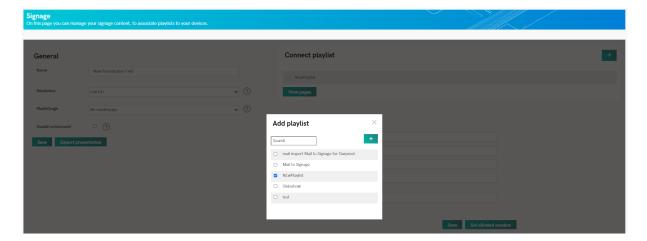

Go to Playlist and create a new playlist (or add the created page into your playlist). Search for your page created and add it to the timeline by pressing the "+" button in the page. The page will be added with a default duration. Make sure you select the page duration you want to show your stream.

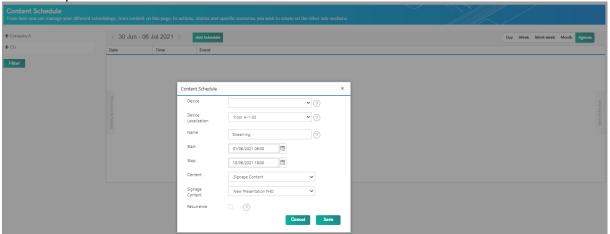

Go to workplace solutions and select "Signage".

Create a new Presentation or take an existing presentation, select the resolution of your Playlist and press "save". Add the Playlist by pressing the "+" button and select your playlist. Click on "+", the playlist will be assigned to the presentation. Press Save.

To finish, you can affect the presentation to your device or group of devices under "Schedules & Alarms" and Content Scheduling. Select in the agenda when you want to show the presentation:

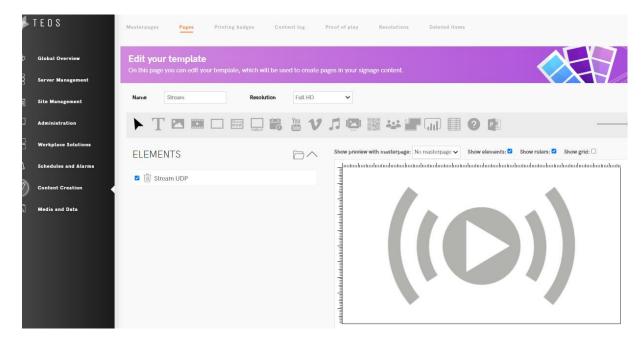

The presentation will be shown by the device at the end of the loop of the device, or you can push the content manually in Administration and pressing the "play" button on the device line.

Basic Signage mode

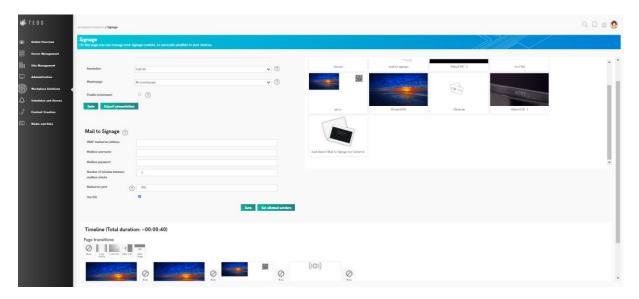

When using the Basic Signage mode, the number of steps is less than in complete mode because there is no need for the user to manage different user rights and different teams for content creation, edition, management etc.

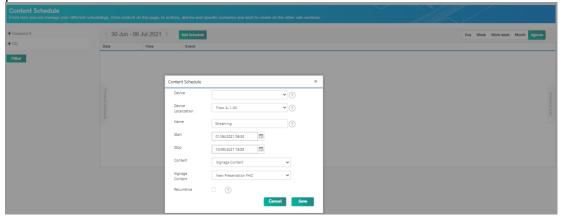

Template and pages merge into one tab "pages" where the template configuration can be done.

Playlist and Signage merge, the playlist can be filled directly from signage tab.

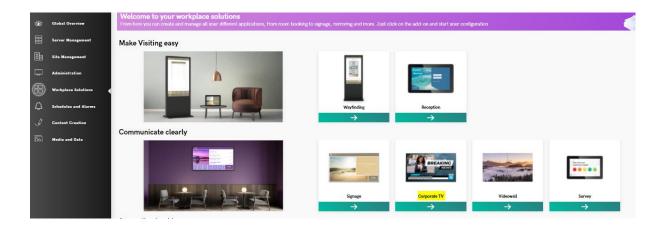

For the content assignment to the devices, the process is the same under Schedules & Alarms" and Content Scheduling. Select in the agenda when you want to show the presentation:

3.2 Creating a Corporate TV configuration

Open your Manage for TEOS interface and go to Workplace Solutions. Open "Corporate TV" and click on "Add new Corporate TV solution".

Define a name for your Corporate TV solution and press save

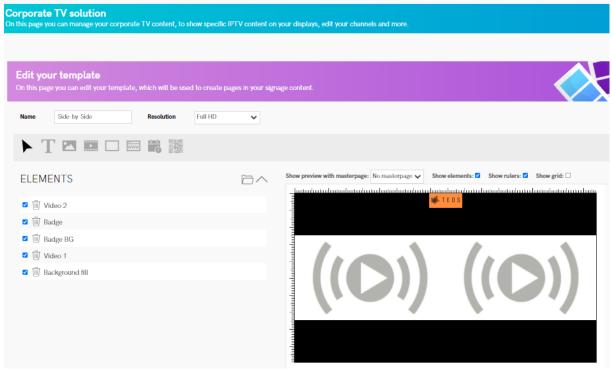

After saving, the default 3 default templates will appear:

- Fullscreen (one stream)
- Picture-in-Picture (two streams)
- Side-by-Side (two streams)

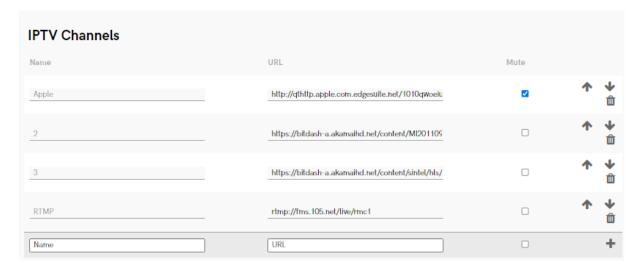

The pages can be customized. To do so, click on the name of one of the pages.

Adding another video or other type of stream (Youtube, Vimeo) is not recommended in this usage. If it is mandatory, we recommend testing the workflow before having it in production.

Add a name, a URL and define if you want your stream to be muted into the section "IPTV Channel". The position of each channel can be changed in the list or can be removed.

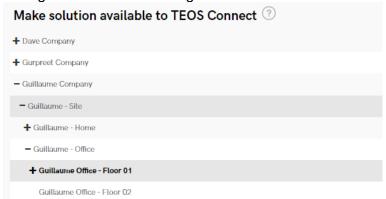

Assign after the device(s) with your Corporate TV solution and define the template by default that will be shown by the device(s). When Affecting a device into the Corporate TV usage, the device will be configured by default for this purpose, select your device, the page by default and the channel, click on the "+" button to add it.

The last configuration part in the right part of the GUI will allow you to define what device group link into the user management will be able to access to the control of the device using TEOS Connect Mobile App. Device group configuration must be done under "site

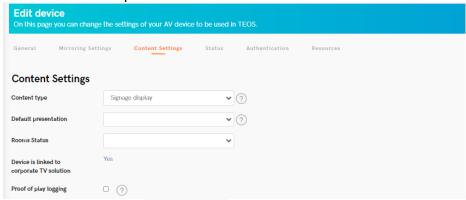

Configuration" in "Site Management"

When the configuration is done, press save. Your Corporate TV solution is now ready to be used.

You can go to Administration and in the device selected for the Corporate TV purpose, edit the device and go to signage settings. In Signage settings, you will be able to see if your device is linked with the Corporate TV solution. You will be still able to select a default presentation.

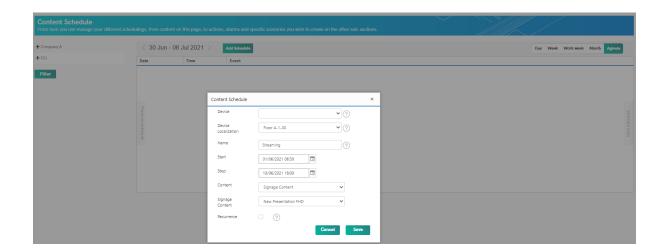

Press the play button if you want TEOS to push the content directly into the device.

IPTV channel can be changed under the Corporate TV interface. For that go back to your TV Coporate Solution and remove your device configuration and add it again with your new channels or another layout.

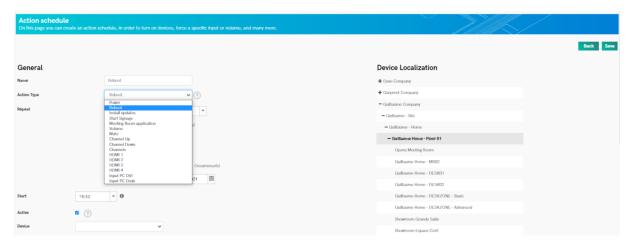

You can also assign Signage content on top of your Corporate TV addon by scheduling it into Manage for TEOS interface. For that go to schedules and alarm and assign in your agenda the Signage presentation to your device.

3.3 Action management in a device with Corporate TV for TEOS

From Manage for TEOS you can schedule your commands to have an automatic control of your devices. For that go to Schedules & Alarms and go to Actions schedules. You will be able to add power, reboot, app updates, start signage, start meeting, mute, manage volume, channel etc. This schedules commands can be addressed to a device or a group of devices. Under power scheduling, a forced schedule will make sure that if the device is powered ON, TEOS will power it OFF if the device must be off based on scheduling.

For Android Player, only the reboot is possible. If a third-party device is connected to the device, this device needs to be integrated into TEOS (please check the third-party compatible document) in order to manage the power ON/OFF under scheduling.

Your devices must be under a device group to be able to send an action schedule.
